

ROMAG aquacare is a leading Swiss company providing technologies and products for the international CSO and stormwater treatment markets

Innovative technologies, plants and equipment for drinking water treatment and stormwater overflow works. Competent in stainless steel - leading in CSO technology. Sustainability is our aim.

At our headquarter in Switzerland, ROMAG develops and manufactures products, manages projects and develops system solutions for municipalities. With more than 1300 CSO screening installations worldwide ROMAG is one of the internationally leading companies in CSO treatment.

ROMAG supports its customers in about 20 countries around the world through subsidiaries or representatives by providing know-how and innovative products for CSO und stormwater treatment. Founded 1949, the employee-owned company utilises modern production facilities where a wide range of high quality products for the international markets are manufactured by highly qualified employees.

In addition to the extensive experience and expertise acquired in project planning and supply of products in the last 20 years, ROMAG presents itself also as a competent partner for retrofitting existing CSO works and stormwater treatment concepts.
